While sleeping giving pressure on right using as a door
Pressure on left …
Pressure on back…
Drinking water before…
Deleting everything…like engine(for business and nucleus for making computer) what mannages…
I don't have to keep any …alone enough and is the only right option after getting free that sure i don't need any restriction limit…

Just made robot for security…what's been Fully programmed by me so can be used that way…i should program them instead using automatic formation where m showing m lazy… like designing suit for them takes time…
Touching metal to enter and taking exit is also one route…
Using r1 r2 …from one place to another
Using my engine to fly …(i never use chances of any conflict so I take soft exit always…
Rolling eye was compulsory before on any trip…this time m stronger many more options unlocked…
Using metal door, also involved touching metal process at the same time…
Sleeping while looking up and down continuously bring enough charges also one door …

#Metal or direct selection
After taking any door…(eye opening process required peace sleeping shifting lane slowly to wake up 100% trying breathing not…there next stop

Or
Or simply a say sleeping here let me open my eye there in that room feels like sleeping there one mindset…

Or select eye roll process to wake in next room …)

……..
Eye rolling process required locking your eye lid somewhere in the middle…

(Turn on device/engine
Flash
Eye flash
Can u give me flash
Jaws as a key
Voice
Mic)
